

Miniature TEDS accelerometer Model 27F11 / F12

Key features

- Miniature teardrop IEPE accelerometer
- IEEE P1451.4 TEDS v0.9
- Adhesive mounted
- Hermetically sealed
- Wide bandwidth

Description

Model 27FXX is a miniature IEPE accelerometer with IEEE P1451.4 Transducer Electronic Data Sheet (TEDS), designed specifically for measuring vibration on mini-structures and small objects. The accelerometer offers a high resonance frequency and wide bandwidth and its light weight effectively eliminates mass loading of the test structure. A field replaceable miniature cable is supplied standard with each unit.

The Model 27FXX features an annular shear design, which exhibits excellent output sensitivity stability over time. These accelerometers incorporate an internal hybrid signal conditioner in a two-wire system, which transmits its low impedance voltage output through the same cable that supplies the constant current power. The signal ground of the accelerometer is connected to the case. If electrical case isolation is needed, an isolation mounting pad is included. Additionally, a tool is included in the package to assist with the proper removal of the accelerometer from its mounting surface.

The model number suffix identifies the range and sensitivity, where 27F11 indicates a 10 mV/g sensitivity, 500 g range unit, and 27F12 indicates a 100 mV/g sensitivity, 50 g range unit.

Miniature TEDS accelerometer | Model 27F11 / F12

The following performance specifications conform to ISA-RP-37.2 (1964) and are typical values, referenced at +75°F (+24°C) and 100 Hz, unless otherwise noted. Calibration data, traceable to National Insitute of Standards and Technology (NIST) is supplied.

| Specifications | | | | |
|--|---------------|--|------------------------------|--|
| Dynamic characteristics | Units | 27F11 | 27F12 | |
| Range | g | ±500 | ±50 | |
| Voltage sensitivity | | | | |

| Product | Description | 27FXX | 27FXX-R | | |
| 3053VM1-120 | Noise, Coaxial Cable Assembly, TPE Teflon Jacket, M3-plug to BNC Plug, 10 feet | Included | Optional | | |
| 2943M1 | Removal tool | Included | Optional | | |
| 2987M9 | Isolation mount | Included | Optional | | |
| 32279 | Mounting wax | Included | Optional | | |
| 133 | 3 channel PE/IEPE signal conditioner | Optional | Optional | | |

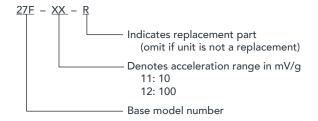

Notes

- 1. 23 Vdc minimum must be available to the accelerometer to ensure full scale operation at the temperature extremes.
- Supply voltage requirement of 20V 30V at -55°C to +100°C, 23V -30V at -55°C to +125°C. 2.
- Supply current requirement of 2mA 20mA at -55°C to +100°C, 2mA 3.
- 10mA at -55°C to +125°C. 4.
- DC bias within 10% of final value. 5.
- 6. Destructive limit.
- Destructive limit. Shock is a one-time event. Shock pulses of 7. short duration may excite transducer resonance. Shock level above the sinusoidal vibration limit may produce temporary zero shift that will result in erroneous velocity or displacement data after integration.
- Mates with Endevco model 3053VM1 cable. 8.
- Be careful not to apply abusive forces when removing the accelerometer from a structure. Hammer taps and wrench "snaps" often impart permanent damage to the case and 9. internal sensors.

Ordering information:

Maintain high levels of precision and accuracy using Endevco's factory calibration services. Call Endevco's inside sales force 1. at 866-ENDEVCO for recommended intervals, pricing and turn-around time for these services as well as for quotations on our standard products.
